The best evidence of a physician's success is the itestimony of his patients. The increasing demands for my professional services prove that I have deat honorably and fairly with those who have consulted me. I never use a patient's name without permission, though have many hundred certificates from those whom I have cured after they had been pronounced incurable. A thorough medical education, with many years hospital experience and familiarity with therapeutic segents, a close observance of temperamental peculiarities and strict attention to hygiente management, insures success, if cure is possible, and I frankly give the cattent my opinion.
